

Please do not allow LPFM broadcasting to displace current broadcasting over translators! We live in a rural community where broadcast translators are the main way we receive our media services. We specifically listen to KLOVE programming and are extremely blessed by it. As a parent, I am extremely concerned and alarmed by what comes over the radio waves to the listening ears of my 4 children. KLOVE programming is completely safe for them to hear as well as it builds up their spiritual lives...mine too! If KLOVE were to be displaced on the translator here it would leave a huge hole in our lives. It is the only station we listen to in the car and at home. We know that it is expensive to run a radio station and that is why there aren't many in this area (and other rural areas like ours). With all of the ugliness in our world today, the positive, encouraging programming provided by KLOVE is something that can benefit any one who listens to it. Please do not allow KLOVE to be displaced by LPFM!

Thank you for your consideration,
Wendy Slawter
